

HPCF UPVC CARTRIDGE FILTER HOUSING (8 or 9 rounds)

HPCF cartridge filter is a filter system with high precision. It consists of the housing and cartridge elements, mainly used in pretreatment. It can be widely used in electronics industry, sewage treatment, beverage, foods, pure water treatment, also it can acts as home water purification equipment.

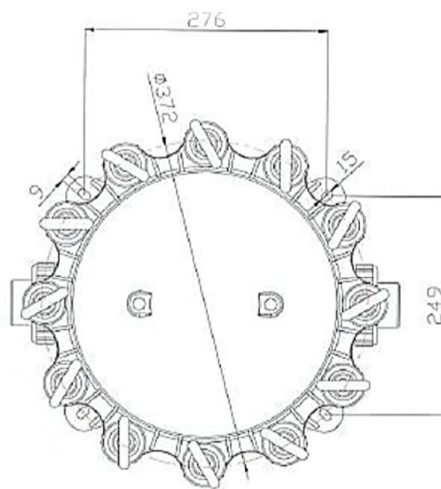

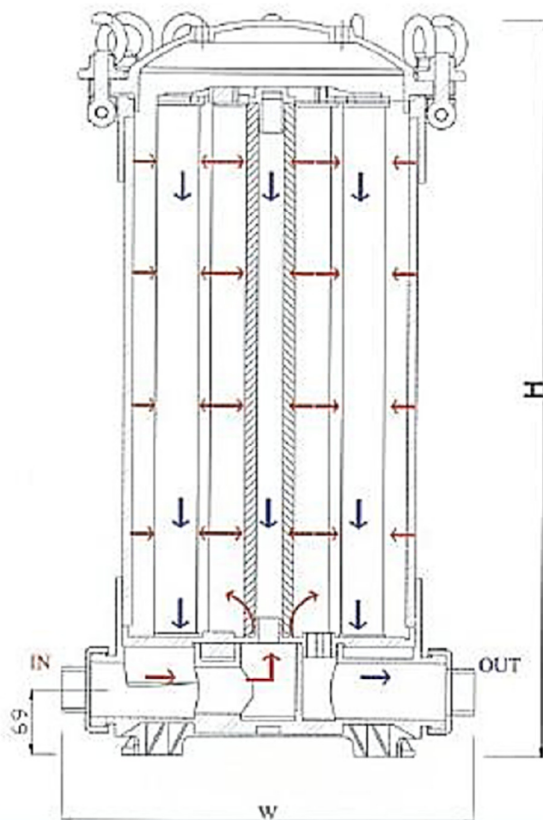

Product Merits:

- 💧 All the parts of this series filter are made of UPVC.
- 💧 The inlet and outlet are in the same line, which connected with the pipe is adopt a 2" or 3" union.
- 💧 The distribution system of HPCF filters is distributed from bottom to top. Water is well- proportional with small strike to cartridges and air is easy to be discharged.
- 💧 The bottom system of HPCF filter is designed together as a whole with the top localizer & closure system. Cartridges are easy to be installed, pushed down and closed, preventing leaking inside.
- 💧 The lid and the body are connected using flange method, ensure a good seal performance/
- 💧 HPCF filter is corrosion resistant. It can be used in SS-non-replace field.
